### 18 - What aspects of the course and/or Michael Healy's instructional methods have you found the most useful or valuable for learning? Please give examples. -

Response Rate	12/23 (52.17%)
<ul style="list-style-type: none"> <li>• I like that the course inspires creativity and gives you a platform to express this creativity in the form of these projects.</li> <li>• Michael is a great teacher. He leads almost every class with a discussion about the readings we were assigned and ties it into the next lesson. He makes things more fun in class and overall, it is a great course.</li> <li>• Michael brings great energy to class and is very casual in the way he teaches, which really helps to foster genuine and fun conversation in class.</li> <li>• Michael was communicative and helpful in his instruction</li> <li>• I loved the projects we did, they really allowed me to add more things into my portfolio</li> <li>• Michael Healy communicated really well with all of his students, providing moments for feedback from students, which was super comforting and refreshing as a student. He made sure that all of our opinions were listened to and was open to working around our schedules and he was super attentive. He definitely shaped the course load according to what worked best for students and I really appreciated that. Professor Healy was the most understanding and welcoming professor I've had all year and his character and performance as a teacher encouraged me to participate more in class.</li> <li>• Michael is my favorite professor. I took him last year for Rhetoric and I was super excited to see him teaching WEPO. He is very communicative with this students and is always asking what he can do better to make our experiences in his class better.</li> <li>• His knowledge of the material was outstanding and he really sparked my interest in the course material. He taught and presented the information in a way that made me want to perfect my learning skills because all of the material was useful for the real world and for my life/job when I graduate.</li> <li>• I liked that we did projects to show our understanding of the coursework and concepts for the class instead of testing. I feel like the projects were easier for me to show my comprehension of the concepts and also allowed me to gain a better understanding of how to write and compose with different mediums.</li> <li>• I think Michael Healy really thinks outside of the box with his assignments and that encourages hands on learning that gives us real experience and content we can use when entering the professional field.</li> <li>• The course has a lot of freedom in what we could create, which was nice and allowed me to think creatively.</li> <li>• He comes up with projects that are interesting and flexible to our abilities.</li> </ul>	

### 19 - What aspects of the course and/or Michael Healy's instructional methods could be improved that would enhance your learning? Please give examples. -

Response Rate	12/23 (52.17%)
<ul style="list-style-type: none"> <li>• None of the readings seemed relevant to the projects we were working on in class and most of them seemed to have uninteresting or overly complicated theories that did not engage me to think critically or even care about them aside from them being required readings.</li> <li>• N/A</li> <li>• Not relying so much on readings, but engaging more in class discussions that may relate to the subject matter</li> <li>• he's really a great teacher all around</li> <li>• I think that some of the reflections were a little pointless, I liked that he wanted to hear from us personally after all of the projects but sometimes they felt like busy work.</li> <li>• lots of reading that was not fun.</li> <li>• Less readings, unless there are going to be quizzes or more material associated with them. I would try to do them all but in reality, when classes pick up, that's the first thing that gets kicked from my to-do list.</li> <li>• Less readings and more in class discussions of the material (: I don't have many suggestions other than making project 2/3 the first projects the students have to complete in the class.</li> <li>• My only critique would be for him to be a bit more clear in his instructions. There were times where i did find myself lost on what he was asking for us to do.</li> <li>• I think the organization of courses could be worked out better.</li> <li>• I found the course very scattered and difficult to organize. I also felt that the class time was not useful, it was mostly spent having us do work I would rather be doing at home. I also would like more concrete ideas of what we have to do for the assignments. I also did not like working in groups, that added to the confusion. I also miss writing which is the main thing I am studying and was hoping to work on in this course.</li> <li>• Maybe less reading since some of the material was pretty dense. Other than that, I have no suggestions.</li> </ul>
